Experience / Skills

Test Automation Engineer 2024 - Present

Alten (Consultant to Raymarine)

-
- Python
 - Javascript / HTML / CSS
 - CI / CD (Github / Gitlab)
 - JIRA / Confluence
 - VS Code / MS Products
 - Product trials
 - Copilot (Gpt / Claude)

- Test automation engineer working in product assurance team on thermal cameras and systems testing in the maritime industry, focusing on real-user tests via selenium for webpage / app usage
- Implement variants of soak and integrated testing for in-dev and released products, utilising pytest and allure reporting to provide scheduled and detailed feedback on new build releases
- Cross-platform integration of Windows/Linux environments to implement CI/CD pipelines and integrated JIRA test execution & reporting
- Carry out systems testing and control through Django server to communicate with a range of different products and monitor network traffic and device diagnostics

Software Engineer 2019 - 2024

EPROD ESCADA

-
- C / Embedded C / C++ / C#
 - SQL
 - TCP / Serial Modbus Connections
 - Spec / system design
 - Visual Studio (2005-2022)
 - Network Diagnosis

- Software developer and installation engineer for SCADA systems (process and machine control systems) for use in the corrugated cardboard industry
- Build systems for desktop applications specific to each project from technical contracts and electrical drawings, collaborating with project managers and electrical / mechanical engineers.
- Develop and configure interfaces for control with manufacturers, using TCP and serial communications with moxa, and PLC interfaces with Siemens PN/PN Coupler.
- Project managerial skills involving communication with customers, project building and travel planning internationally for myself and others.

Masters degree 2015-2019

University of York

-
- 1st class honors MEng

- MEng Electronic Engineering with Music Technology Systems
- 4th year project (1st – 73%), Using evolutionary algorithms to analyse speech deficits in Parkinson's Disease sufferers before and after Deep Brain Stimulation (DBS) surgery

Finance Scraper Personal Project	- App for parsing finance data from PDF documents and visualise through graphs and database viewers - Uses chaquo library for running python within Kotlin framework and vico for charting data - Can support multiple banks, trading platforms and investment brokers transactional information detailing history of transactions
Password Manager Personal Project	- App for password management across websites / apps / systems, can navigate to other android apps from one central location - Uses chaquo library for running python within Kotlin framework and cryptography for encryption - Can export / import JSON file which is fully encrypted to transfer / restore data, biometric login also encrypted using android libraries - PC app written in PyQt to allow visualisation of passwords on desktop
Auto Stock Trader Personal Project	- Django project with PyQt app controller to view, analyse and make trades on US stock market through IBKR integration - Live information on high ranked stocks with feedback of what best to choose to enter / exit which can be set to automated decision making - AI to analyse past behaviour and success / loss of trades made and factors in data for reasoning for success rate - Usage of celery channels / redis server to handle asynchronous request and callback functionality of IBKR API

Activities and Interests

- Strong musical interest, been playing guitar, bass, piano and drums for many years and have been part of multiple bands
- Socialise with friends both local and afar, travelling across the UK to meet up
- Exploring new places and food either as part of work travel or recreational
- Compose in multiple genres of music (Metal, Rock, Chiptune, Electronic Dance Music, etc.)
- Play multiple genres of video games on multiple platforms (FPS, RPG, Rhythm, Racing, etc.)
- Stay active by going to the gym a few times a week and playing 5-a-side football
- Have a full driving licence
